

## **Towngas China holds Rice Dumplings for the Community event**

(29 June 2020) Towngas China Company Limited (Towngas China) led its project companies in hosting the Rice Dumplings for the Community event with infection control measures in place as per the Chinese Government’s anti-pandemic regulations. In addition to conserving traditional culture, the event serves to promote a harmonious and caring relationship among community members through providing support to those in need on the festive occasion to celebrate Dragon Boat Festival.

Towngas China has remained committed to its corporate social responsibility philosophy of “benefitting society through active participation in social services; contributing to the community through dedicated efforts in environmental protection”. On top of ensuring the effective operation of its gas business, the Group has taken the initiative to organise and participate in a wide range of public welfare activities as part of its concrete efforts to support community growth and benefit the public.

Every year on the eve of Dragon Boat Festival, Towngas China leads its project companies in a collaboration with local welfare organisations, schools and the rest of the community to prepare rice dumplings and gather for a celebration. This year, the Group presented over 20,000 rice dumplings to people in need from charitable organisations, elderly homes, special education centres and impoverished families.
