

Towngas China Gentle Breeze Movement enters the northeastern area at Hecheng district

(25 September 2019) On 25 September, Towngas China’s Gentle Breeze Moment entered northeastern China to join our Qiqihar colleagues in launching school aid activities and spreading the love to both teachers and students at Qiankule Primary School at Fularji district, Qiqihar. Since its establishment in 2005, our Qiqihar operations have viewed charity as a long-term task and upheld the principle of “benefitting society through personal contributions”, and built a volunteer team of over 200 people.

At the ceremony, Young Pioneers of China at Qiankule Primary School helped guests put on red scarves as a token of appreciation for the warmth and hope they shared with all members of the school. Cui Wei, Deputy Governor of the Fularji district, Isaac Yeung Chung-kwan, General Manager – Corporate Affairs of The Hong Kong and China Gas Company Limited (Towngas) and Senior Vice President of Towngas China Company Limited (Towngas China), He Yuhong, Towngas China Vice President, and Liu Haidong, Towngas China Qiqihar General Manager, took part in the ceremony with other guests, and unveiled the plaques for Towngas China Gentle Breeze Movement and Towngas China Charity Library together.

Through this programme, Towngas China built two charity libraries, donated an all-in-one learning platform, a ping pong table, a volleyball court, a badminton court, uniform, sports shoes and other teaching supplies, and refurnished the flag-raising podium. In addition, in order to enhance safety management, we built a security room that is equipped with electronic heaters, and installed four ventilators fans and openings and replaced four old doors at the lab to better cater for the climate of the north. Through doing our part, we hope to enhance the learning environment for both the students and teachers.

At the ceremony, the students expressed their gratitude for life through a Manchu folk dance, with fast-paced moves that demonstrate the positivity of Chinese youth. The enthusiastic applause also reflected the hope harboured by guests for the future pillars of the country.

Isaac Yeung Chung-kwan, Towngas General Manager – Corporate Affairs and Towngas China Senior Vice President, expressed that it is our responsibility as a corporation to support and prioritize the development of the educational industry. In

recent years, in addition to ensuring safe and stable gas supply, Towngas China has promoted the Three Courtesies service culture and advocated applying the principles of courtesy and integrity in our everyday lives. As a public utility, we are grateful to the community for their trust and support, and trying our best to give back is also a form of courtesy that every corporate should have. We hope to continue to spread our love to those in need through the Towngas China Gentle Breeze Movement.
